The *Exequeter* Opens 8 days before any Term begins except *Trinity-Term*, before which it Openeth but Four Days. Observe also that the first & last days of every Term, are the first & last Days of Appearance.

The Glorious Planet *Venus* is Occidental of the Sun, and this Year our Bright Evening-Star till April the 5. then she becomes Oriental, as will be our bright Morning-Star all this Year, and Rises before the Sun till the 24. of Jan. 1686.

Four times this Year will the *Luminaries* be Eclipsed, and all Inconspicuous to us, but only one of the Moon, which falls November the 19. near 11 at Night, and may be seen if the Air be clear; 'twill be almost half darkned, and worth Observation. There is an Eclipse of the Moon also, but invisible to us, May the 27. near 11. in the Forenoon, also an Eclipse of the Sun, May the 12. about 7 in the Morning; Another November the 5. near 10 at Night, but not to be seen in our Hemisphere; and therefore no more need be said thereof. In Michaelmas Term early in the morning, may be seen Saturn and Mars rising together, with two Notable fixed Stars, &c.
